

ISO 13485

Quality management system certification for medical devices

The international standard ISO 13485 is for producers and suppliers of medical devices and related products

A certificate issued by an independent, accredited certification body guarantees that a quality management system has been implemented, documented, used, maintained and improved by the supplier or producer of medical devices.

Benefits of 13485 certification:

- guarantees high quality of provided services and products
- reduces production loss rate
- reduces operational costs
- provides an accepted management system as part of the Route to Conformity for CE Marking
- increases effectiveness across the whole organisation
- increases your customers' trust in you as a safe supplier or producer
- is an excellent training tool for employees and staff.

Why choose URS?

URS is accredited by the internationally recognised United Kingdom Accreditation Service (UKAS).

The extensive range and high quality of the services provided by URS has attracted more than 40,000 contracts across 32 countries.

Certified organisations can include URS and UKAS logos in their promotional activities.
